Turning Ideas Into Reality
April 2017

Make today matter
Meet your future client
Why should we evolve?

- Students have moved beyond the point of consuming information. Today students want to apply what they are learning / consuming
- Provide a enhanced learning experience
- Upskill students with hands-on experience
- Better prepare them for the job market
- Stimulate research and innovation.
- Staying relevant.
What can be created?

- Creation can be of a digital or physical nature
- Objects that form part of their current curriculum
- Can be a hobby or self-enrichment related project
- Objects, processes, material and designs that are not the norm for standard library services.
MakerSpaces / HackLabs / FabLabs

- Physical space where community gathers to share knowledge and ideas
- Location that provides access to tools, platforms and social interaction
- No specific layout
- No specific set of tools
- There are different subcultures of MakerSpaces with needs based on the requirements of organisations
