Section 4. Introduction

4.1 Inst1

Good day my friend! Thank you for taking time out today and joining us on the the HERStory study. We are part of a research team from Epicentre and the South African Medical Research Council. What will you be helping me with today? Well, today you will be completing this very important form with me. Why do I need this information from you? Your story is important. We want to learn from YOU! The information I will get from you today will help me know more about young people like yourself in South Africa. Each section you complete will help us understand the successes and challenges of young people in South Africa. YOU have the power to influence the solutions we find for young people in South Africa. How does this form work? There are various sections- each with specific questions on your life and health. All you need to do is select the option by touching the screen [FIELDWORKER to demonstrate how to use tablet] Select NEXT to continue

Expects a single option response (required), Default: NEXT

NEXT [0]

4.2 Inst2

Remember this is not a test and there is no right or wrong answer! We want you to be honest with us. If you are uncomfortable with sharing any information with me that is also fine- you can just select I do not want to answer option . If you want a break, just tell the person on our team. If any questions upset you, you can stop at any time. You do not have to give a reason. Your decision to answer questions or stop being in the study is entirely up to you. Will anyone know about the important information you share with me? The information you give me will not be shared with any other participants, friends, parent or guardian or caregiver, teachers or nurses. I really value the information you give the Epicentre team and I. We will keep it a secret. No one will know the information is yours as this form will not contain your name, just a unique project number. The only time we will not be able to keep it a secret is if you tell us you plan to harm someone, or you tell us that you plan to harm yourself, or if you tell us the name of someone who is abusing you. If you tell us these things, we are required by law to report them so that we can arrange help for you, or for the person you plan to harm. Select NEXT to continue

Expects a single option response (required), Default: NEXT

NEXT [0]

4.3 Inst3

What do you do if you are unsure about any of my questions? If you are unclear about any big words that I use, please ask me and I will explain them to you. For example, if you don't know what a caregiver is, I will tell you it is someone who acts like a parent to you and is responsible for you. For example, they might give you love, take care of you when you are ill, make your food, and iron and washes your clothes. For the questions that are very private, I will let you enter your answers in the device in a way that I cant see your answers. I will read the question and then give you the device for you to enter your answer privately. I will not be able to see your answer after you have entered it. When it comes to these private questions, you will need to know how to answer. Here is some information.

Expects a single option response (required), Default: NEXT

NEXT [0]

4.4 Inst4

What do you do if none of the options listed match your answer? For certain questions, some of the options may not contain your specific answer, please feel free to select Other (please specify), once selecting this option , it will take you to a text box where you can add in your answer. What do you do if you have more than one answer? Some questions will have an instruction telling you (You may choose more than one option) this will allow you to select all the options that match your answer What do you do if you are unsure how to operate the Tablet ? When you are answering the private questions, if you are unsure how the device works or if you need assistance with answering then please ask me. I will help you without seeing your answer OK, are we ready? Cool, lets go!

Section 11. Sexual Experiences

11.1 sexintro

****NOTE TO FIELDWORKER**** For this section, the participant must answer each question privately without you seeing her response. We would now like to ask you some questions about your relationships and sexual history. We are going to focus on your relationships with boys and men. Some women have sexual relationships with women. However, almost all the question we will ask you now are about you relationships with boys and men. We will provide very detailed descriptions for some questions. We ask these questions so that we can learn as much about the experiences of young people like you today. I will read the questions to you and hand you the device so you can enter your answer privately. I will not know what your answer is. This will allow you to answer the questions in complete privacy. No one will be able to see the answers you put into the survey device. We appreciate you answering honestly and sharing as much information with us as possible. Select NEXT to continue
