

Study group	N	Mean eNO at 48 weeks (95% CI) (log transformed)	Geometric mean ratio of log eNO at 48 weeks (95% CI)	p- value
Azithromycin	71	14.5 (12.6-16.8)	0.86 (0.72-1.03)	0.103*
Placebo	67	17.3 (15.0-20.1)		

**Supplementary Table 2.** Effect of azithromycin on levels of eNO after 48 weeks of treatment using a generalized linear model. eNO, exhaled nitric oxide.

eNO, exhaled nitric oxide; CI, confidence interval;
